

Data Center Offer Review Checklist

A checklist for evaluating a ground lease, purchase offer, or easement from a data center developer.

-
- ☐ Deal structure: is this a ground lease, a purchase, or an easement?
 - ☐ Rent or price per acre, and how it compares to nearby offers
 - ☐ Escalation clauses — does rent increase over time, and by how much?
 - ☐ Option period length and the payment made during that period
 - ☐ Power and utility commitments made by the developer
 - ☐ What happens to the agreement if the project is never built
 - ☐ Who is responsible for site restoration if the deal falls through
-

This is a preview file used to test the purchase and download flow. The finished checklist will replace this document before the product goes live.
