

Solar Lease Red Flags Checklist

A checklist of the terms most likely to work against you in a solar lease — and what to ask instead.

-
- ☐ Escalation clause — is there one, and is it tied to a clear schedule?
 - ☐ Lease term length, including all renewal options
 - ☐ Whether renewals are automatic unless you actively object
 - ☐ Decommissioning responsibility and any bond or financial guarantee
 - ☐ How rent is calculated if the project's footprint changes
 - ☐ Restoration requirements once the lease ends

This is a preview file used to test the purchase and download flow. The finished checklist will replace this document before the product goes live.
